

TOURING EXHIBITION	
TITLE/SUBTITLE	Whodunit? Murder Mystery at Menagerie Park
DEVELOPMENT STATUS	Available for hire
OTHER PARTIES	
DATE OPEN	1997, refurbished 2004
SIZE	600 sqm
DESCRIPTION	A body, a break-in, some fingerprints, an eyewitness report and a mystery to solve. Through interactive exhibits, visitors need to gather evidence to help piece together the jigsaw and solve the crime. Working like a forensic scientist, visitors sift through the evidence to provide an accurate picture of what went on in the park.
CONTENT	Exploring the science and technology used in forensic science, <i>Whodunit?</i> includes exhibits focusing on physics, biology, chemistry, mathematics and plenty of new technology. Expert information and advice was provided by a range of forensic experts, ensuring the content is accurate and as true to life as possible.
